

Learning Support Committee

1. In order to cater for learner diversity, our school has applied for and obtained different grants from the EDB to organize Chinese, English, Mathematics and Science enrichment courses for gifted or talented students. For junior form students, Chinese, English and Mathematics enhancement courses have been provided to improve their learning. In the second term, leadership training programmes have been organized to help the students understand their strengths and weaknesses, relieve their pressure and develop their leadership skills.
2. Our school has applied for and obtained a 'School-based Grant' from the EDB, providing various learning activities for students who need financial support. We have organized English Grammar Enhancement Courses for F.1 and F.2 students. Our school has also subsidized students who took part in musical instrument courses and for the Form 1 bridging programmes in the first term.

Our school has also provided fruit to the students on 'Happy Fruit Days' to promote the importance of a healthy and balanced diet.

3. Our school has implemented a Community-based project in collaboration with 'HKSCH Lady MacLehose Centre' which is subsidized by the EDB. It aims at raising students' self-esteem and confidence in learning. In the first term, some students visited Ocean Park. They took part in a workshop on sharks. During the post-exam period, an 'Adventureship' programme has been organized to enhance their creativity, social and problem-solving skills by confronting challenges in groups.
