The History Wall is HCY's Hall of Fame. Will there be your names one day?

Library is always the store room of knowledge of human civilisations. From Herodotus to Jonathan Spence, Qin Shi Huang to Mao Zedong, all the historians and greatest figures are ready here to serve, waiting for your exploration!

Ordinary bulletin boards are used for poster displaying, yet the glass board in the History Room is more than that. Students can draw, paint and write on it. You name it! Words are no longer the only medium of learning and teaching. Other visual tools, such as timeline, maps and photos are also 'history teachers'!

Thanks to the high resolution of the e-board, learning experience has now become more enjoyable than ever. Instead of listening passively, students can now become actively involved in lessons. Their answers and questions can be displayed on the e-board within a second. The learning pace is now in the hands of students. They can become their own teachers!
