I. School Aims

The full development of morality, intellect, physique, sociability and aesthetics is the common aim of every secondary school. Tsuen Wan Public Ho Chuen Yiu Memorial College is no exception. As a grammar school, our primary aim is to prepare our students for tertiary education, that is, to develop their intellectual ability so that they achieve good results in public examinations, acquire good language skills and become self-motivated. We also provide moral education for them and promote traditional Chinese culture so that our students will be able to care for society, serve society and carry out their civic responsibilities. Lastly, we strive for the full development of the five aspects of education. In fact, the pursuit of educational aims is endless. Therefore our school motto, ‘Rest in the Highest Excellence’, is the target we set for all our students.

IV. School Development

A. Use of Grants

1. Capacity Enhancement Grant

The aim of the grant is to relieve the workload of teachers and enhance effectiveness in learning. As such, it was used to employ two teaching assistants to assist teaching. Also, the grant subsidized the F.1 Bridging Programme to help F.1 students to develop confidence in using English as the medium of learning. Furthermore, the grant was used to run the activities organized by the “Counselling Services Team”, “F.1 Growth Group” and “Peer Mediation Scheme” so as to help students develop leadership skills and build good relationships. Last but not least, it enriched the Life Education Programme by inviting speakers for talks and organizing outdoor visits to museums and cultural activities.

2. Additional Support for Secondary Schools Adopting English-medium Teaching Scheme

The school received funding from the EDB Additional Support for Secondary Schools Adopting English-medium Teaching Scheme. Firstly, the school equipped the English Café with up-to-date teaching and learning resources in order to enhance the English environment on campus. Secondly, it subsidized an English online learning programme for students to read more extensively. Lastly, it was used to run a debate course to improve our students’ communication skills.

3. Refined English Enhancement Scheme

The fund financed the school to run several English-related activities. Firstly, it was used to run the Campus Reporter for students to record and report news about major school events in English. Secondly, it was used to hire an out-sourced group of educators to produce an English drama show to promote students’
interest in learning English through drama. Thirdly, the school ran an English public speaking programme for F.4 students and a drama workshop for F.2 students to enhance their speaking skills. Fourthly, a teacher was employed to create space for existing teachers to design school-based teaching materials. Last but not least, a training camp was organized for the English prefects at school.

4. **Enhanced Senior Secondary Curriculum Support Grant**

The grant was used to help with the implementation of the new senior secondary curriculum. In the 2012-13 school year, a teacher and a teaching assistant were employed to allow existing teachers time for the planning and implementation of the curriculum.

5. **Liberal Studies Curriculum Support Grant**

This grant was specifically dispatched for the development of the Liberal Studies curriculum. The Department made use of it to employ a tutor on Saturdays to run remedial lessons for the academically weaker students and intensive lessons for the academically stronger students in the subject. It was also used to employ a 0.5 teacher to share the workloads of Liberal Studies teachers.

6. **Diversity Learning Grant**

This grant is targeted at the academically gifted students in school. We provided a writing workshop for the students to write scripts in English for our drama performance. Also, there were enrichment courses for students who were academically strong in Chinese Language and Mathematics. With the fund, the school also ran an affective education course which focused on emotional problems and stress management and subsidized students to attend external enrichment courses.
7. School-based Grant

This grant is targeted at students who are in need. The fund subsidized students who were in need to take part in different programmes to broaden their horizons, including the F.1 Bridging Programme, English Drama Club, Chinese Enhancement Course and English Enhancement Courses on grammar and public speaking for both junior and senior form students. Other than that, students were also funded to receive musical instrument training.

8. Teacher Relief Grant

This grant is used for relieving teachers’ workload. It was used for employing 6 teachers, 2 teaching assistants, 3 IT technicians and supply teachers. Also, we used the grant to hire a coach for the Debate Team. In addition to these, we subsidized our students who joined different activities including the Chinese enhancement course, Drama Club, grammar workshop, public speaking workshop, musical instrument courses and the F.1 Bridging programme.

9. Learning Support Grant for Secondary School

The grant aims to give teachers support and help students with special learning needs. It was used to employ a teaching assistant for students with special educational needs and hire the service of a speech therapist. Also, it was used to run activities for the F.1 Growth Group and organise a leadership training camp for senior form students.

10. Senior Secondary Curriculum Support Grant

To help teachers relieve their workload, one teaching assistant and one teacher were employed with this fund.
B. Evaluation of Major Concerns (2012-13)

1. To refine the implementation of the NSS curriculum

The NSS curriculum was launched in 2009 and the school has been reviewing it over the years to ensure that students will learn best.

On one hand, F.3 students were provided with a wide range of subject choices so as to cater for their diverse interests. In the previous school year, over 80% of students were allocated their top three most-preferred subject electives. Subject panel heads had also discussed widely the combinations of these elective choices for the optimal benefits of the students. On the other hand, the school offered academic support to students who had withdrawn an elective or the extended curriculum for Mathematics by arranging enhancement courses. Students who had dropped an elective had to take enhancement classes for Chinese Language, English Language, Mathematics and Liberal Studies for a better foundation while students who had dropped the extended curriculum of Mathematics had to take extra Mathematics lessons. By the end of the year, over 75% of F.5 students had improved their results in at least two of the four core subjects and about 50% of students improved their Mathematics results after taking these courses.

To enrich students’ school life and obtain other learning experiences, the school encouraged students to take part in activities or voluntary services to broaden their horizons. All senior form students were required to fulfill at least 4 hours of social service and the school also offered opportunities for students to go on cross-border visits to help them build up a nation-wide vision and understand the needs of different people. For the production of the self-learning profile, the process had been improved with the new intranet system and the whole process of data collection from both teachers and students was made smooth. Students were distributed their self-learning profiles in March 2013 for university application. In addition to this, the
Careers Committee organized various information days and talks for our F.6 students and parents to disseminate information about tertiary education so as to help them plan their future path.

After the second HKDSE examination, subject panels held meetings to evaluate the effectiveness of their teaching. The positive correlations of students’ results in both internal and external assessments have proven that appropriate teaching strategies and modes of assessment had been deployed. Also, panel heads from different departments discussed and exchanged their thoughts frequently about the launch of school-based assessment.

Together with the two self-study rooms and the library, students were supported substantially and the results in the second HKDSE were satisfactory.

2. To build our school as a learning community

A host of measures were adopted in a bid to improve the learning atmosphere and environment for students. To do this, the school library played a very crucial role in promoting reading. Over the year, the library had organized a number of themed book exhibitions for different events at school, e.g. Mathematics and Science Week and English Week. It also encouraged students to read extensively through a reading award scheme. At least 100 students took part in the scheme and read for fun and knowledge. There was also an increasing stock of English books in the library to help students with learning through English as the medium of instruction. By the end of the year, the overall circulation rate has increased by more than 10%. We believe that students would do independent learning once their interest in reading was enhanced.

On top of that, reading was integrated in routine learning activities in class. Subjects like Chinese History, Chinese Literature and
Chemistry enriched their subject contents with different reading articles. Also, teachers were highly aware of the needs of enhancing students’ critical thinking, creativity, communication and problem solving skills. These elements were included in their teaching programmes prepared at the beginning of the school year as well as the lesson plans. Communication skills were further strengthened through different speaking activities and events. Over 200 students took up duties such as hosts of ceremonies, announcers and student helpers who made their speeches and announcements in English on various occasions. With the funding from the Refined English Enhancement Scheme, extra manpower was gained and the English Department completed a school-based textbook for F.2 students with cross-curricular themes about Science and Geography. This was done in the hope that students would transfer their knowledge across different learning areas and teachers from different subjects would have more chance to collaborate.

The school ran Saturday remedial classes for the weaker Liberal Studies students and English drama training was also organized for F.1-F.5 students to stimulate their interest in the learning of English. For the gifted or talented students, enrichment courses for Chinese Language, English Language and Mathematics were provided to stretch their academic potentials. These students also received information about gifted programmes outside school on a regular basis.

For teachers, they actively cooperated through co-designed assignments and undertook peer lesson observation with each other. Besides that, professional sharing of examinations strategies and teaching methodologies was conducted throughout the year. The Preparation Committee for Life and Society was set up and the teachers worked together to produce the school-based curriculum for the students in the junior forms. Teachers within the same subject panel were also more involved in teaching and learning issues
through actively planning and implementing departmental major concerns. All in all, the sharing practice kept teachers updated with new academic issues.

3. To reinforce the culture of consideration and care in school

To achieve this, all school stakeholders, including staff, parents and students, were informed about the mission on different occasions. At school level, the culture of consideration and care in school was reinforced through academic and non-academic curriculums. On one hand, subject departments adopted the idea of consideration and care in the design of learning activities. On the other hand, committees for Life Education Curriculum, Student Affairs, Counselling, Discipline and Extra-curricular Activities were acutely aware of the importance of instilling the values of caring and mutual respect into students’ minds when launching activities. They helped organize activities that facilitated more communication among students to pass on the message of caring for one another in school. Throughout the year, senior form students were trained to take up leadership roles to show care towards junior form students. For example, senior form students were recruited as assistant coaches in the sports teams to train younger members and the Peer Mediation Programme trained students to be peer mediators to help solve conflicts among junior form students.

In addition, the school spared no effort to show care towards students with diverse educational needs. In particular, the school matched each academically-weaker student with a teacher mentor and a study skills training programme was organized for the weaker students in F.1. Also, the students with special educational needs, emotional/behavioural difficulties and intermittent absence tendency were well attended-to. Besides a teacher co-ordinator, a teaching assistant for SEN students was employed. We hired the services of a school educational psychologist and assessment adaptations were
made when necessary. For those academically stronger and gifted students, the Learning Support Committee organized workshops on affective education to help them learn better in school.

Above all, the school adopted a number of measures to strengthen relationships so that a more harmonious school environment could be built. On staff development days, teachers took part in activities that focused on team building and peer appreciation. Also, over the year, class teachers, Counselling teachers and Discipline teachers met on a regular basis to discuss the needs of students and shared strategies on class management. This year, a speaker from the Family Planning Association was invited to give a talk to keep teachers abreast with current youngsters’ issues. For students, the “Angel Scheme” and “Campus Caring Ambassadors Scheme” were set up to enhance relationship among students. The annual PTA award scheme also helped achieve the goal of showing appreciation and recognition to fellow schoolmates.

Last but not least, to ensure a holistic approach to creating a harmonious and caring environment in school, the “Healthy School Policy” was revised and implemented in school to make sure that the learning environment would be optimized.

C. Major Concerns 2013-2014

(1) To promote sharing among teachers and enhance the effectiveness of teaching and learning

(2) To strengthen the learning skills of the students and develop their academic potential

(3) To enhance students' self-respect, respect for others and sense of belonging to the school
