

Hong Kong Fire Services Department (New Territories South Command, South Division) and Koon Man Space participating in STEAM Week

It was a great honor for our school to invite Mr. Lee Ho Yin, Deputy Divisional Commander (New Territories South), Mr. Wong Kee Kiu, Station Commander of Lei Muk Shue Fire Station, and their team of firefighters to organize and participate in our STEAM Week activities. Through professional and in-depth demonstrations, the firefighters shared invaluable knowledge with our students regarding the latest advancements in firefighting technology. Students gained significant insights into modern rescue operations, including the practical application of quadruped robots (robotic dogs) in fire services.

Furthermore, our school extends its heartfelt gratitude to Koon Man Space for generously providing a series of informative and beautifully designed exhibition panels. These exhibits seamlessly blend photography, natural ecology, community building, and cultural history. By vividly presenting the stories of the Hakka village in Chuen Lung, Tsuen Wan, the exhibition successfully captured the students' interest and curiosity.
