

Form 4 Greater Bay Area Career Exploration Tour

To enrich the learning experiences of F.4 students and provide them with first-hand exposure to the nation's latest developments, our F.4 students participated in the "Greater Bay Area Career Exploration Tour" on 27 March 2026. By visiting Shenzhen Foreign Languages School, students observed the similarities and differences between the campus cultures and classroom models of the two regions. Through cross-cultural exchanges with Mainland teachers and students, they recognised the vital role of linguistic communication in cultural integration.

Furthermore, the itinerary focused on cutting-edge applications of Artificial Intelligence in education, scientific research, and industry, enabling students to grasp the latest trends in innovation and technology. This field trip not only deepened their understanding of national conditions but also inspired them to reflect on the profound impact of the GBA's technological environment on their future academic and career planning.

During the visit, our Principal, thirteen teachers, and the entire F.4 cohort engaged in exchange activities at Shenzhen Foreign Languages School. Students toured various campus facilities, including the library, AI-powered sports hall, gymnasium, and school history gallery. They also attended a French language course, gaining a deeper understanding of the local learning environment and teaching models while experiencing the distinctive educational characteristics of the region.
